General Land Use: Other - Described Above

Affected Medium: Topsoil

Distance Nearest Occupied Building: 1.5 Mile

Distance Nearest Water Well: 1.5 Mile

Type of Incident: Other

Release Contained in Dike: Yes - Within Dike

Reported to NRC: Unknown

	Spilled	Units	Recovered	Units	Followup	Units
Oil						
Brine	4	Barrels	2	Barrels		
Other						

Description of Other Released Contaminant:

Inspected:

Written Report Received:

Clean Up Concluded:

Risk Evaluation:

no immediate risk

Areal Extent:

10 foot by 30 foot

Potential Environmental Impacts:

very little chance of impacting surface or ground water do to the location and the soil make up. There weren't any water sources around to contaminate and the soil had a lot of clay in it making absorption very slow. Clean up was immediately started when trailer began to leak.

Action Taken or Planned:

Vac truck was on scene when the trailer began to leak, sucking up the spilled water from the ground. Dirt dike was built to prevent the spill from covering a lot of area.

Wastes Disposal Location: Clean Harbors

Agencies Involved: Mountrail County Emergency Management

Updates

Date: 7/25/2014 **Status:** Reviewed - Follow-up Required

Author: Roberts, Kris

Updated Oil Volume:

Updated Salt Water Volume:

Updated Other Volume:

Updated Other Contaminant

Notes:

Vehicle accident due to muddy road. Trailer rolled over, and apparently a seam opened on the trailer and began leaking as transfer proceeded. Response was to build a berm in the ditch in front of the flow, and then recover the leaking brine there. County emergency manager was on scene. Strata has been retained as cleanup contractor. Followup to confirm adequate cleanup is necessary.

Date: 11/18/2014 **Status:** Inspection

Updated Other Volume:

Updated Other Contaminant

Notes:

11-18-14 - 12:08 on location. Location is 152-91-2 NE. Physical description of the impact location accurate, except that it is at the head of a drainage, with a culvert running under the road (flow to the NE) at the east end of the impact zone. Sparse to no vegetation reestablishing in the impact area over the summer. However, there is little chance of any noticeable impact with future runoff events. No further inspections needed unless vegetation stress is reported in the drainage north of the road in 153-90-32 SW.
